PROFESSIONAL SUMMARY

AI Solutions Engineer and Full-Stack Developer with experience in **Enterprise AI Solutions**, **B2B Client Engagement**, and **Solution Consulting**. Skilled in identifying business pain points and building ROI-driven AI solutions using **Agentic AI**, **Secure RAG**, **LLM Applications**, **Multi-Agent Systems**, **Python**, **FastAPI**, and **React**. Proven ability to own customer engagements end-to-end—from scoping and architecture through production deployment—designing reliable AI systems with strong **context engineering**, **eval pipelines**, and **workflow automation** at scale.

CORE COMPETENCIES

- **AI & Agents:** Agentic AI, Secure RAG, LangChain, LangGraph, LLM Orchestration, Context Engineering, Tool Use, Structured Outputs, MCP Servers, Voice AI (STT/TTS), Eval Pipelines
- **Full Stack:** Python, FastAPI, Django, Flask, Node.js, NestJS, Express.js, React.js, JavaScript, TypeScript, REST APIs, Microservices, Solution Architecture
- **Data & Infra:** PostgreSQL, MongoDB, MySQL, Vector Databases, ClickHouse, AWS, Docker, Git, CI/CD, Kafka/SQS, System Design, Query Optimization
- **Delivery:** B2B Client Engagement, Cross-Functional Collaboration, Production Support, Debugging, Performance Optimization, Technical Documentation, Agile Methodology

EXPERIENCE

AI Solutions Engineer

ApexNeural | Aug 2025 – Present

- Worked directly with **enterprise clients** across industries to understand business pain points, workflows, and operational challenges; owned technical arcs from scoping through production.
- Consulted clients on **AI adoption strategies** and designed ROI-driven solutions focused on cost reduction, process automation, and measurable business outcomes.
- Built and deployed **Agentic AI systems**, **Secure RAG pipelines**, **voice/conversational workflows**, and automation using **LangChain**, **LangGraph**, **FastAPI**, **NestJS**, **Django**, and **React**.
- Designed end-to-end AI systems meeting **reliability**, **latency**, **accuracy**, and **cost** constraints; set up **eval pipelines** and iterated on retrieval quality, improving relevance by approximately **18%**.
- Presented **solution architectures**, demos, and technical recommendations to client engineering and business stakeholders; translated requirements into scalable production systems.
- Established **end-to-end and regression testing infrastructure**, lowering production incidents by approximately **20%** and improving release confidence.

R&D Intern, Data Engineering

NIT Warangal | Apr 2025 – Jul 2025

- Implemented **AgriHelp**, a full-stack web and mobile supply chain platform for the AgriTech sector, streamlining operations across Telangana and Andhra Pradesh.
- Built **data pipelines** including cleaning, transformation, validation, and analysis of agricultural datasets using **Python**, **FastAPI**, **Flask**, and **TensorFlow**.
- Authored research on **Agentic AI for AgriTech**, focusing on multi-agent orchestration systems and model experimentation with **TensorFlow**, **PyTorch**, **SHAP**, and **LIME**.

PROJECTS

HOPE – Product Developer & Deployment Lead [🔗](#)

May 2026 – Present

- Built an AI-powered English learning platform for **Tier-2/3 and BPL government schools**, delivering personalized learning pathways through Agentic AI and adaptive learning.
- Designed and implemented **Agentic AI orchestration**, **FastAPI** backend services, and individualized learning pipelines for scalable deployment.
- Led end-to-end product development and on-ground deployments, working directly with principals, teachers, and education officials to integrate the platform into school workflows, gather field feedback, and drive product adoption.

Voice AI Enterprise Platform [🔗](#)

Apr 2026

- Built an **enterprise Voice AI platform** for outreach and campaign workflows with **real-time voice pipelines** (STT, LLMs, TTS) and call analytics dashboards.
- Scoped and integrated voice systems into client campaign workflows, tuning **latency, reliability, and cost** constraints for production deployment at scale.

L1 Support AI [🔗](#)

Jan 2026

- Developed an **AI-powered L1 support agent** with ticket triage, **RAG-based knowledge retrieval**, and escalation workflows; reduced manual ticket handling by approximately **35%** and resolution time by **25%**.
- Set up **eval pipelines** on live ticket data to measure resolution accuracy and iterated on retrieval and escalation logic with client engineering teams.

Kutum – Multi-Agent Family Management Platform – Product Lead [🔗](#)

Aug 2025

- Developed a scalable **multi-agent architecture** for reminders, events, budgeting, and health records using **OpenAI/Groq APIs**, **NestJS**, **PostgreSQL**, and **React**.
- Applied AI-driven nudges and workflow automation, lowering manual follow-up effort by approximately **20%**.
- Owned the client-facing product arc from requirements scoping through production rollout, aligning agent workflows with stakeholder operational needs.

PharmaOCR – Intelligent Document Processing [🔗](#)

Dec 2025 – Feb 2026

- Built OCR-based document processing with **Python microservices**, APIs, and validation workflows; reduced manual effort by approximately **35%** and improved accuracy by **20%**.
- Integrated extraction pipelines into client document workflows, debugging end-to-end failures and tuning validation logic for production-grade accuracy.

Vision AI Platform

Feb 2026

- Built a **Vision AI SaaS platform** with real-time inference pipelines, automated reporting, and **Apache Superset + ClickHouse** analytics dashboards.
- Deployed inference into customer environments, resolving infrastructure and integration constraints while setting up monitoring for production reliability.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering
Keshav Memorial Institute of Technology, Hyderabad

2021 – 2025
CGPA: 8.1/10

CERTIFICATIONS

- **R&D Certificate** – NIT Warangal (Agentic Intelligence across Industries) ([Certificate](#))
- **LangChain Essentials** ([Credential](#)); **LangSmith Course** ([Credential](#))
- **Claude Code in Action – Anthropic Education** ([Verified, Mar 2026](#)); **Claude 101** ([Verified, Mar 2026](#))
- **Fullstack & Observability**: Python Data Science Fullstack, Langfuse
- **GenAI Hackathon Winner** ([Certificate](#))
- **Leadership Certificates**: NSS Coordinator ([Certificate](#)); Give and Growth Event ([Certificate](#))
