PROFESSIONAL SUMMARY

AI-focused Full-Stack Engineer with production experience delivering **SaaS platforms**, **LLM-powered applications**, and **end-to-end automation systems**. Skilled in developing scalable REST APIs, multi-agent AI workflows, and responsive frontends using **Python**, **TypeScript**, **FastAPI**, **NestJS**, **Django**, and **React**. Strong track record of shipping AI-integrated products from concept to deployment in Agile environments.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL, Dart
- **Backend:** FastAPI, NestJS, Django, Flask, REST APIs, Microservices Architecture
- **Frontend:** React, Tailwind CSS, Responsive Design
- **AI/ML:** Generative AI, LLM Orchestration, Agentic Workflows, RAG Pipelines, OCR, TensorFlow, PyTorch, Explainable AI
- **Databases:** PostgreSQL, MongoDB, MySQL, Vector Databases, ClickHouse
- **Cloud & DevOps:** AWS, Docker, Git, GitHub, CI/CD, Render, Vercel
- **Testing & Quality:** End-to-End Testing, Regression Testing, Automated QA Workflows

EXPERIENCE

AI Context Engineer

ApexNeural | Aug 2025 – Present

- Built **LLM interviewer pipelines** with **Claude Code**, cutting pre-development clarification loops by approximately **25%** through earlier edge-case discovery.
- Delivered **production automation systems** spanning **NestJS**, **FastAPI**, **Django**, and **React**, improving cross-team API/UX alignment and reducing handoff defects by approximately **15%**.
- Engineered **OCR + RAG pipelines** using **Vision APIs**, open-source models, and **Vector Databases**, improving retrieval relevance by approximately **18%** in internal evaluation.
- Established **end-to-end and regression testing infrastructure** that lowered production incidents by approximately **20%** and improved release confidence.

Research and Development Intern

NIT Warangal | Apr 2025 – Jul 2025

- Built **AgriHelp**, an AI-powered agricultural supply chain platform using **Python**, **FastAPI**, **Flask**, and **TensorFlow** for crop prediction and yield analysis.
- Trained and evaluated ML models with **TensorFlow**, **PyTorch**, **SHAP**, and **LIME**, improving recommendation consistency by approximately **12%** over initial baselines.
- Authored technical documentation and contributed to model experimentation, reducing experiment setup and reporting time by approximately **15%**.

Freelance AI Solution Engineer

Symbiotes.ai | Jan 2023 – Present

- Delivered **production-ready AI platforms** and backend systems for enterprise and startup clients using **FastAPI**, **Python**, **n8n**, and **LLM orchestration frameworks**.
- Built and deployed **voice agents**, **automation workflows**, and **AI copilots** for real-time conversational and operational use cases across multiple domains.
- Developed **AI-powered ad generation pipelines** using tools including **Higgsfield**, **Kling**, **GenVR.ai**, and **generative AI models** to automate high-accuracy video and creative production workflows.
- Engineered **enterprise analytics dashboards** and workflow systems for contractor networks and retail businesses, including solutions for large-scale operational monitoring and reporting.

PROJECTS

Voice AI Enterprise Platform [↗](#)

Apr 2026

- Built an **enterprise Voice AI platform** for outreach and campaign workflows.
- Designed **real-time voice pipelines** using STT, LLMs, and TTS systems.
- Developed dashboards for **call analytics and engagement tracking**.

L1 Support AI [↗](#)

Jan 2026

- Developed an **AI-powered Level 1 support chatbot** that automated repetitive enterprise queries and decreased manual ticket handling by approximately **35%**.
- Created **ticket triage, knowledge-retrieval, and escalation workflows** to cut average resolution time by approximately **25%** and improve first-contact resolution.
- Executed structured response playbooks and automation logic to ensure consistent support quality across teams.

PharmaOCR – Intelligent Document Processing [↗](#)

Dec 2025

- Built an **Indic handwritten OCR pipeline** for pharmaceutical documents using denoising, binarization, skew correction, and contrast normalization.
- Enabled accurate extraction from complex medical forms and prescriptions across mixed scripts, improving downstream validation throughput by approximately **20%**.

Kutum – Multi-Agent Family Management Platform [↗](#)

Aug 2025

- Developed a scalable **multi-agent architecture** supporting reminders, events, budgeting, secure vaults, and health records for family units.
- Applied AI-driven nudges and workflow automation using **OpenAI/Groq APIs, NestJS, and PostgreSQL**, lowering manual follow-up effort by approximately **20%**.
- Built a responsive, cross-device frontend using **React** and **Tailwind CSS**.

LawFolks – AI-Powered Legal Automation [↗](#)

Sep 2024

- Built an AI-first legal workflow platform supporting **document drafting**, filing automation, and **RAG-based legal research**.
- Developed backend APIs with **Django + PostgreSQL** and a **React + Tailwind CSS** frontend for streamlined user experience.

Vision AI Platform

Feb 2026

- Built a **Vision AI SaaS platform** for live camera analytics.
- Developed **real-time inference pipelines** and automated reporting workflows.
- Integrated **Apache Superset + ClickHouse** for fast analytics dashboards.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering
Keshav Memorial Institute of Technology, Hyderabad

2021 – 2025
CGPA: 7.79

CERTIFICATIONS

- **Research and Development Internship Certificate – NIT Warangal** ([Certificate Link](#))
- **LangChain Essentials** ([Credential](#))
- **Claude Code in Action – Anthropic Education** ([Verified, Mar 2026](#))
- **Claude 101 – Anthropic Education** ([Verified, Mar 2026](#))
- **GenAI Hackathon Winner** ([Certificate](#))
- **LangSmith Course** ([Credential](#))
- **Leadership Certificates:** NSS Coordinator ([Certificate](#)); Give and Growth Event ([Certificate](#))
